RED & GREEN provides a forum for critical thinking and debate on the Left. As a journal of theory and politics, our aim is to help build the intellectual culture essential to the development of the Left in New Zealand. The editorial line is informed by past struggles for justice and equality, and inspired by the struggles of today. RED & GREEN is the journal for Left thinkers and activists from the Alliance, Greens, Labour and the trade unions; for socialists, anti-capitalists, anarchists, academics and others, young and old, interested in proving that another world is possible.
